SUMMARY

I am an undergraduate Computer Science student at NED University of Engineering and Technology.

Passionate about machine learning, artificial intelligence, data analysis, and software development, I have built a strong foundation through academic coursework and personal projects. I am a quick learner with strong analytical and problem-solving skills, eager to apply my knowledge, and gain valuable industry experience through an internship.

PROJECTS

Blood Bank Management System

Oracle SQL • Oracle APEX

- Designed relational database with normalized tables.
- Built forms and dashboards using Oracle APEX.
- Implemented donor, blood inventory, and request management.

DNA Mutation Detection

C++

- Built a DNA mutation detection system using stacks, queues, and AVL trees.
- Optimized sequence search and comparison using efficient data structure

Automated Web Content Analysis

Python • NLTK • Scikit-learn • Transformers

- Built an NLP pipeline for scraping and preprocessing web data.
- Performed sentiment analysis and topic classification.
- Applied transformer models for semantic similarity.

EDUCATION

NED University of Engineering and Technology

B.S in Computer Science | 2023-present
Specialization in Data Science

Olevels, WHALES College | 5A*s and 4As
2019-2020

Alevels, The City School PAF Chapter
2021-2022

SKILLS

Technical Skills:

Programming & Analytics:

Python (Pandas, NumPy, Matplotlib, Seaborn), C++, SQL, Excel (Dashboards, Charts, Formulas)

Machine Learning & Forecasting:

Scikit-learn (Classification, Clustering, Regression), Prophet (Time Series Forecasting)

Data Handling & Databases:

MySQL, Oracle APEX, Data Simulation, Web Scraping

Data Structures & Algorithms:

Binary Search Trees, Linked Lists, Stacks, Queues, Maps, Vectors

Text & NLP Analysis:

NLTK, Vader, Sentiment Analysis, Tokenization, Lemmatization, Word Frequency

Soft Skills:

Problem-Solving, Logical Thinking, Team Collaboration & Learning Mindset
